

Fed up with broken MCF actuators?

## MCF Upgrade Package

The Ronningen-Petter® MCF Pressure Screen upgrade kit has been developed for better filtering results, easier access and easy and safe use.

This update kit guarantees less hassle, optional finer filtration – and way less wear parts and a better performance.

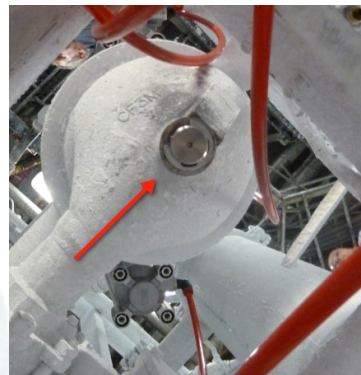

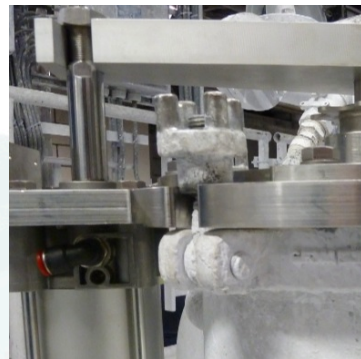

# How to easily upgrade the Ronningen-Petter / Eaton MCF to a new level of filtration experience:

- Gain retention benefits and get more open area if wanted
- Less maintenance, less wear parts
- No proximity switches needed
- Profit of metric design
- Easy access, and
- Way lower maintenance cost
- Many options available

The MCF is actually close to a perfect filter; easy access, good filtration all that...

If you are happy with the actuator life the upgrade kit is nothing for you.

If you have a problem with the actuator wear, check out this option!

Plug the bottom hole

Remove the existing lid and mag drive. Fasten new actuator where the old lid used to be. Plug the bottom hole, reassemble the unit with the new lid! Connect the airlines to the new actuators. The rebuild is done in about 2-3 hours!
